Dear Parent/Guardian,

Pursuant Senate Bill 751 being passed into law amid the COVID-19 pandemic, districts must notify parents of students with disabilities. This notice must depict the district decision to provide a “good faith” effort to address the nonfunctioning of the typical school day. The districts must provide continuity of education through enrichment opportunities or instruction. At this time, the Clarion- Limestone School District has chosen to provide enrichment opportunities that are outlined on the district website and have been shared via email and school reach calls. The LEA proposes this action based on compliance with law surrounding the COVID-19 pandemic. The district has reached this proposal based on guidance from Federal and State authorities in order to provide continuity of education through enrichment. Guidance has been inconsistent from all authorities so the district is taking the stance of providing a “good faith” effort that ensures students have access to enrichment opportunities. Given a change in guidance, the district will provide written notice as to the direction and recommendation for providing services to your child. The district is working to receive further guidance that would allow for the opportunity to provide continuity of education via other vehicles and delivery services. Once guidance from the department of education or Governor Wolf dictates a change that will impact the current proposal, the district will evaluate and potentially modify the current continuity of education proposal. This recommendation does not supplant the special education programming for your child given a typical brick and mortar school day. This notice serves as communication in order to outline the LEA proposal to adhere to the guidance of providing continuity of education via the enrichment model.

Thank you,

Jason Edmonds
